Oracle multi-échelle et représentation automatisée de diagrammes formels basés sur l'algorithme cognitif

28 mai 2021 Joséphine Calandra

Séminaire : Sémiologie générale et musicologie

Objectifs de la recherche

- Modéliser la structure et l'analyse paradigmatique et automatiser cette modélisation
 - Proposer un modèle qui se soumet aux contraintes de l'écoute
 - Paramétrisation du système

Compression

- On commence par le diagramme de niveau le plus haut
- Si le matériau n'a jamais été vu, on inscrit le nouveau label et on ouvre une parenthèse, puis on descend au niveau inférieur
- Si le matériau a déjà été vu, on inscrit le label correspondant et on parse l'objet suivant

Compression
