<b>Contents</b>	<b>3</b>
<b>1 Introduction</b>	<b>11</b>
1.1 What is a translation surface? . . . . .	11
1.2 Examples . . . . .	24
<b>2 Basic topological and geometrical aspects</b>	<b>49</b>
2.1 Topological classification of surfaces . . . . .	49
2.2 Covering spaces . . . . .	53
2.3 Singularities and the space of linear approaches . . . . .	58
<b>3 Symmetries</b>	<b>69</b>
3.1 Analytic affine automorphisms: isometries and translations . . . . .	69
3.2 Every group is a Veech group . . . . .	72
3.3 Affine groups and Veech groups of coverings . . . . .	78
3.4 Hooper-Thurston-Veech construction . . . . .	97
3.5 The Veech group of baker's surfaces $B_{\frac{1}{q}}$ . . . . .	108
<b>4 Translation flows</b>	<b>113</b>
4.1 Translation flows and interval exchange transformations . . . . .	113
4.2 Málaga maps . . . . .	119
4.3 The jungle of infinite interval exchange transformations . . . . .	119
4.4 Entropy . . . . .	125
4.5 Parabolicity . . . . .	128
4.6 Criteria for completeness of the flow . . . . .	131
<b>5 Recurrence and diffusion</b>	<b>133</b>
5.1 Recurrence in finite area . . . . .	133
5.2 The boxes lemma . . . . .	135
5.3 Recurrence in periodic and non-periodic windtree models with $a = b = 1/2$ . . . . .	136
5.4 Recurrence in $G$ -coverings . . . . .	139
5.5 Hooper-Thurston-Veech . . . . .	143
5.6 Diffusion rate and quantitative recurrence in $G$ -coverings . . . . .	144
<b>6 Invariant sets and invariant measures</b>	<b>149</b>
6.1 Ergodicity and non-ergodicity of $G$ -coverings . . . . .	149
6.2 Hooper-Thurston-Veech . . . . .	152
6.3 Minimality . . . . .	155
6.4 Typical minimality and ergodicity from approximation by compact surfaces . . . . .	160
6.5 Remarks . . . . .	162
<b>A Background on dynamical systems</b>	<b>163</b>
A.1 Topological dynamics and measurable dynamics . . . . .	163
A.2 Invariant measures of topological systems . . . . .	163
A.3 Recurrence . . . . .	164
A.4 Skew-products . . . . .	165

<b>B Group action and the hyperbolic plane</b>	<b>169</b>
B.1 Approximation in Fuchsian groups . . . . .	170
B.2 Rosen continued fractions for $G_\lambda$ . . . . .	171
<b>C Compact translation surfaces</b>	<b>175</b>
C.1 Interval exchanges and suspensions . . . . .	175
C.2 Keane theorem and closed invariant sets . . . . .	175
C.3 Deviation of Birkhoff averages and diffusion . . . . .	176
C.4 Ergodicity and invariant measures . . . . .	177
C.5 Oseledets theorem for KZ (Chaika-Eskin) . . . . .	177
C.6 Affine and Veech groups . . . . .	178
C.7 Dilatation surfaces . . . . .	181
<b>D Eigenvalues of infinite graphs</b>	<b>183</b>
<b>E Affine structures on surfaces</b>	<b>185</b>
E.1 Definition and examples of affine structures . . . . .	185
E.2 Developing maps and holonomy . . . . .	185
<b>F Discussion to have, open problems to solve</b>	<b>187</b>
F.1 The zero section in the extended tangent space . . . . .	187
F.2 Ends of coverings . . . . .	187
F.3 $\text{Aff}(M)$ is closed in $\text{MCG}(M)$ . . . . .	187
F.4 Non-commutative KZ cocycle . . . . .	187
F.5 Potential examples for the introduction . . . . .	188
F.6 The metrics on flat surfaces of infinite type . . . . .	188
F.7 Huge coverings . . . . .	188
F.8 Affine symmetries of Panov planes (and quadratic differentials) . . . . .	189
F.9 Panov plane . . . . .	189
F.10 Similitude structure with non-properly discontinuous actions . . . . .	189
F.11 Ehrenfest . . . . .	189
F.12 Nilpotent coverings: Veech groups, recurrence . . . . .	190
F.13 Further questions . . . . .	191
